7	Singularity&Infinity Co., Ltd.	https://gosaico.com/en	2015	Singularity and Infinity is a software startup that specializes in "Mathematical Optimization" and "Data Science." By combining top mathematicians and software engineers, we assist the logistics industry in optimizing their delivery operations from warehousing, transportation, to last-mile delivery. With highly flexible, scalable, and efficient computations, we significantly reduce operating costs while improving throughput and capacity. On average, we improve the transportation capacity of logistics fleets by over 33% and save up to 25% in fleet mileage. Moreover, we eliminate the reliance on the experience of individual drivers that traditional logistics companies heavily rely on for decision-making. With the assistance of artificial intelligence, we minimize human biases and align the interests of logistics companies with company goals.
